OL/2019/32/E-Part A Answer all questions on this question paper itself. • Area of the curved surface of a right circular cylinder of radius r and height h is  $2\pi rh$ . 1. Customs duty of 9% is charged for a certain item that is imported. If the value of this item is 6000 rupees, find the amount that has to be paid as customs duty. Find the factors:  $x^2 + 3x - 10$ 2. Find the value of x according to the information given in the figure. 3. 100 If it is given that  $\log_2 a = 5$ , write the value of a as a power of 2. 4. 5. Find the time it takes to fill a tank of capacity 420 litres using a pipe through which water flows at a rate of 60 litres per minute. 6. The points A, B, C and D lie on the circle shown in the figure.  $A\hat{B}C = 100^{\circ}$  and  $C\hat{A}B = 30^{\circ}$ . Find the value of x. niti di peri t 00° 7. The base radius of a solid right circular cylinder is 7 cm. Its height is 10 cm. Find the area of the curved surface of the cylinder. (Use  $\frac{22}{7}$  for the value of  $\pi$ .)

[see page three

28669 Index No :.... OL/2019/32/E-I -3-8. Find the gradient of the straight line represented by AB in the figure. 0 2  $\frac{ax}{2} \div \frac{3a}{4x}$ 9. Simplify : 10. In the given figure, the side CB of the right angled triangle ABC is produced to F. The midpoints of AB and CB are E and D respectively. If  $D\hat{E}B = 50^\circ$ , find the magnitude of EÊF. Solve:  $2x^2 - 8 = 0$ 11. 12. A man takes a loan of 5000 rupees for two years at an annual interest of 8% with the interest compounded annually. How much is the interest for the second year for this loan amount? A cyclic quadrilateral ABCD is shown in the figure. The side AB is produced to E. Moreover, 13.  $B\hat{C}D = 120^{\circ}$  and  $C\hat{B}E = 70^{\circ}$ . Find the values of x and y according to the given information. F [see page four

- 5. (a) It is given that the first two symbols of a certain password are two different digits from the digits 1, 2, 3, 4, 5. To choose the first digit of the password, a student randomly picks a card from five identical cards on each of which one of these digits is written. Then, without replacing it, he randomly picks another card to choose the second digit. (i) Using the symbol ' $\times$ ', mark the sample card space of the two digits on the cards 5 that the student randomly picks, on the Digit on the second given grid. 4 3 2 1 5 2 3 4 Digit on the first card
  - (ii) It was later discovered that the first digit which was obtained for the password was odd and that this digit was less than the second digit that was obtained. Indicate the event that satisfies these conditions on the sample space and obtain its probability.
  - (b) During a period when a certain disease was spreading, 20 males and 16 females who displayed the symptoms of this disease arrived to obtain medication from a physician. Although all the females actually had the disease, the probability of a person picked at random from among the males actually having the disease was 0.6.
    - A portion of a tree diagram drawn to indicate the probabilities of a person picked at random from all these people, being a male or a female and being a person having the disease or not having it is shown below.

salach

- (i) Complete the tree diagram by indicating all the relevant probabilities.
- home of a strength in the store bas sets of the major in policity of the
- (ii) Find the probability of a person picked at random being a person having the disease.

## Part B

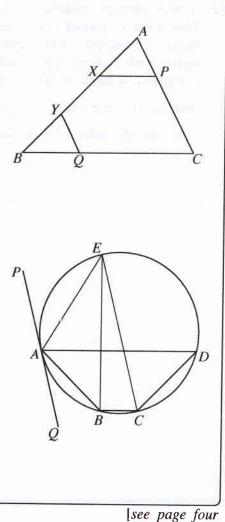

Answer five questions only.

- 7. Sunitha who hopes to participate in a sports event trains by jogging daily. She spends 105 minutes in the first week and 119 minutes in the second week for this. The time she spends training each week when taken consecutively, lie in an arithmetic progression.
  - (i) Find the common difference of this arithmetic progression.
  - (ii) Find in minutes, the time she spends training in the 7th week.
  - (iii) In which week does the time she spends training during a week first exceed 221 minutes?
  - (iv) (a) Find the total time she spends jogging during the first 10 weeks of training.
    - (b) If the average speed at which she jogs is  $6 \text{ km h}^{-1}$ , find the total distance she jogs during that time.
- 8. Use only a straight edge with a cm/mm scale and a pair of compasses for the following constructions. The construction lines should be drawn clearly.
  - (i) Construct a straight line segment AC of length 6 cm and construct the line AB such that  $C\hat{A}B = 60^{\circ}$ .
  - (ii) Construct the angle bisector of  $C\hat{A}B$ .
  - (iii) Construct the circle that has its centre O on the above constructed angle bisector and touches AC at C. Produce the line AO such that it meets the circle at D.
  - (iv) Construct the tangent to the circle at D and mark the point of intersection of this tangent and AC produced as P.
  - (v) Give reasons why  $D\hat{P}C = A\hat{O}C$ .
- 9. In the given figure, ABC is a triangle. X and Y are two points on AB such that AX = BY. Moreover, P is a point on AC such that  $XP \parallel BC$  and Q is a point on BC such that  $YQ \parallel AC$ .

Copy the given figure onto your answer script and indicate the above information in it.

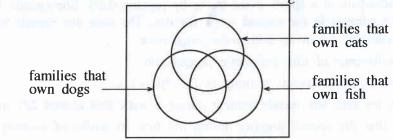

- (i) Show that  $\Delta AXP \equiv \Delta BYQ$ .
- (ii) Draw the straight line PQ and show that  $PQ \parallel AB$ .
- (iii) The lines *PX* and *QY* produced meet at *D*. If DX = XP, show that  $XY = \frac{1}{2}PQ$ .
- 10. In the cyclic quadrilateral ABCD shown in the figure,  $D\hat{A}B = A\hat{D}C = 45^{\circ}$ . The straight line drawn from B perpendicular to AD meets the circle at E. The line PAQ is the tangent drawn to the circle at A.

Prove that CE is a diameter of the circle and that it is parallel to the tangent PAQ.

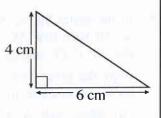

## OL/2019/32/E-II

11. A survey was conducted on 115 families that own pets. Information on the families that own dogs, cats and fish as pets from these families and an incomplete Venn diagram drawn corresponding to it are given below.

- 4 families own all the above three types of pets.
- The number of families that own only dogs is 19.
- 24 families own both dogs and cats while 21 families own both dogs and fish.
- 11 families do not own any of the above three types of pets.
- (i) Copy the given Venn diagram onto your answer script and include the above information in it.
- (ii) The number of families that own dogs is twice the number of families that own fish. Find the number of families that own fish but **do not** own dogs.
- (iii) How many families own only cats?
- (iv) The number of families that own only fish is twice the number of families that own cats and fish but **not** dogs. Find the probability of a family selected at random from those surveyed being a family that owns only fish.

12. A hemispherical container of radius r is completely filled with water. This water is poured into a glass container in the shape of a prism, having a triangular cross section with the measurements shown in the figure, such that no water spills out. Then the water fills this glass container to a height of 10 cm. Show that the radius r of the hemispherical container is obtained by  $r = \sqrt[3]{\frac{180}{\pi}}$  cm, and taking the value of  $\pi$  as 3.14, find the value of r in centimetres to the first decimal place.
