Level) Examination, August 2019 22.08.2019 / 0830 - 1030 ගෘහ ආර්ථික විදාහාව පැය දෙකයි மனைப் பொருளியல் I **Home Economics** இரண்டு மணித்தியாலம் Two hours **Instructions:** * Answer all the questions. * Write your Index Number in the space provided in the answer sheet. * Read the instructions given on the back of the answer sheet carefully. * In each of the questions 1 to 50, pick one of the alternatives from (1), (2), (3), (4), (5)which is correct or most appropriate and mark your response on the answer sheet with a cross (x) in accordance with the instructions given on the back of the answer sheet. 1. An element and a principle of designing are respectively (1) rhythm and texture. (2) shape and proportion. (3) unity and rhythm. (4) emphasis and colour. (5) texture and shape. 2. Select the correct statement regarding exterior and interior designing. (1) Long and broad furniture is suitable for the interior space of a room with high walls. (2) The way of arranging the space for movement according to the landscape is termed as circulation. (3) Use of translucent glass for the roof is the most suitable to obtain natural light in to a room. (4) Heat of the interior could be decreased by using cement blocks for the walls of a building. (5) In exterior designing, a soft landscape could be obtained by trimming the plants into different shapes. 3. Select the correct statement from the following. (1) Symmetric balance is shown by placing two different objects on a cabinet equidistant from the centre. (2) Secondary colours are formed by mixing two primary colours in different proportions. (3) The same feature shown in different forms in a design is termed as repetitive rhythm. (4) Unity is shown through harmony in shape, colour and texture of accessories. (5) Proportion is shown by placing two suites of furniture closer to each other in a small room. 4. Which is the **incorrect** statement regarding construction of buildings and landscaping? (1) The basic constructive idea in the mind of a designer is termed as context. (2) The interior should be designed so as to maintain the utility. (3) In designing, the shape, size and height should be emphasized. (4) In exterior designing, waterfalls and ponds are considered as accessories. (5) Building houses with wattle and daub walls and roofs with coconut leaves are considered as the beginning of landscaping in Sri Lanka. 5. What is the group that contains two carbohydrates? (1) Mucin and Collagen (2) Collagen and Elastin (3) Lignin and Pectin (4) Mucin and Lignin (5) Elastin and Pectin

6. Two non essential amino acids	are	
	(2) Leucine and Tyrosine.(5) Cysteine and Serene.	(3) Alanine and Hystidine.
7. From the following, the Omega		
	(2) Palmitic acid.(5) Oleic acid.	(3) Arachidonic acid.
8. Pyridoxine and Folic acid inclu	ded in B group vitamins are ident	ified respectively as
(1) vitamin B_5 and B_7 . (4) vitamin B_9 and B_{10} .	(2) vitamin B_6 and B_7 . (5) vitamin B_{10} and B_{12} .	(3) vitamin B_6 and B_9 .
 9. From the following, which state (1) Regulate the body temperate (2) Helps in the digestion and (3) Maintains the electrolyte ba (4) Controls the stability of the (5) Acts in the excretion of exceeded and the excretion of exceeded and the exceeded an	ure. absorption of nutrients. lance of the body.	body.
10. Following statements give the r		18.
A - Contain calcium and B - Rich in vitamin A C - Contain vitamin B_2 and D - Iron is abundant		
E - A source of vitamin		
From these, the statements rega (1) A and B. (4) A, C and D.	rding the nutritional value of milk (2) B and E. (5) C, D and E.	(3) A, B and C.
11. From the following, what is the (1) Pepsinogen (2) Prorenin	e inactive enzyme in the stomach (3) Trypsinogen (4) Renin	of infants that digest protein? (5) Pepsin
 12. A digestive action in the duode (1) converting polypeptides to a (2) converting disaccharides to (3) converting dipeptides to am (4) converting starch to monosa (5) converting proteins to protein 	lipeptides. monosaccharides. ino acids. accharides.	
13. A factor which is not causing (1) consuming food containing (3) drinking tea soon before or (5) having gastric ulcers.	-	
14. Two stages in the life cycle, w(1) infancy and adulthood.(3) childhood and adolescence.(5) adulthood and old age.	where the nutritional requirement is (2) infancy and lac (4) childhood and p	tation.
15. The cut-off values for the hip(1) 0.8 for males and 0.9 for f(3) 0.8 for males and 0.7 for f(5) 0.7 for males and 0.6 for f	Temales.(2)0.7 for males aTemales.(4)0.9 for males a	nd 0.8 for females.
	having gastritis is s. (2) including food having fibre lk. (5) consuming small portions a	

- 3 -AL/2019/28/E-I (NEW) 17. Select the response that includes a thickening agent and a softening agent used in cooking food respectively. (1) sugar and cinnamon (2) coconut milk and tomato (3) rice flour and ginger (4) vinegar and tamarind (5) garlic and goraka 18. The methods/method of heat transfer involved in poaching an egg are/is (1) conduction and convection. (2) convection and radiation. (3) conduction and radiation. (4) only convection. (5) only conduction. 19. Two extrinsic factors causing microbial food spoilage are (1) moisture and pH value. (2) relative humidity and nutrient content. (3) atmospheric oxygen and relative humidity. (4) atmospheric oxygen and pH value. (5) moisture and nutrient content. 20. Following are some statements regarding food preservation by heat treatment. A - The aim of pasteurisation is to destroy the pathogenic organisms and to inhibit certain enzymes. B - During Ultra Heat Treatment (UHT) the packaged food is kept at 130°-150°C for a few minutes. C - During freezing the microbial actions are not inhibited totally. During deep freezing the water soluble vitamins are unaffected. From these, the correct statements are (1) A and B. (2) A and C. (3) B and D. (4) A, C and D. (5) B, C and D. 21. Following are some statements regarding single thread chain stitch. A - Used in stitching button holes and fixing buttons. B - A curved needle is used in stitching. C - Is a stitch that easily comes out. D - A few stitches are sewn back to finish the stitching. From these, the correct statements are (1) A and B. (2) A and C. (3) A and D. (4) B and C. (5) B and D. 22. Select the correct statement. (1) Hydrogen Peroxide is a reductive bleach used in bleaching fabrics. (2) Fabrics with plain weave are less in strength. (3) The solution formed in nylon manufacture, is made into fiber by melt spinning. (4) In weft knitted fabrics, the lengthwise stretchability is more. (5) Woolen fabrics are much affected by micro-organisms. 23. In burning, which of the following fabrics leaves a ball which could not be crushed by fingers? (1) Nylon (2) Cotton (3) Cellulose acetate (4) Wool (5) Asbestos 24.

[See page four

- 26. Which is the correct statement from the following?
 - (1) When using the Zig-zag lock stitch, the correct and wrong sides of the fabric are seen differently.
 - (2) In the garment industry, only the straight knives and band knives are used for cutting fabrics.
 - (3) Terylene and rayon belong to the group of regenerated fibers.
 - (4) Overlock stitch is used as a method of finishing edges.
 - (5) Garments made of fabrics with water-proof finish are comfortable to the body.
- 27. The diagram shows the cross-sectional view of a fiber. This fiber is
 - (1) mercerised cotton.
 - (2) polyester.
 - (3) silk.
 - (4) linen.
 - (5) rayon.

- **28.** Following are some statements regarding drafting and stitching the skirt. Select the correct statement from them.
 - (1) In drafting the skirt, the length from waist to hip is considered as 21.5 centimeters.
 - (2) One centimeter should be lowered from the hip measurement in shaping the side.
 - (3) Two darts are introduced to the front skirt block.
 - (4) The waist darts should be turned towards the center fold when stitching.
 - (5) One centimeter of sewing allowance should be kept in stitching the back opening of the skirt.

29. The most suitable characteristics in developing inter-personal relationships are

- (1) competitiveness and attraction. (2)
- (2) attraction and appearance.
- (3) appearance and leadership. (4) leadership and attraction.
- (5) competitiveness and leadership.
- 30. From the following which is the correct statement regarding verbal communication?
 - (1) There is more ability to confirm.
 - (2) Response is delayed.
 - (3) Easy to study repeatedly.
 - (4) Others' attention could be drawn.
 - (5) Easy to clarify doubtful instances.

31. In developing interpersonal relationships, 'Negotiation' is

- (1) building up initial conversation among individuals.
- (2) stating personal views.
- (3) listening to others attentively.
- (4) discussing according to personal interest.
- (5) reaching a productive decision through discussion.

32. Given below are three types of questions asked in an interview.

- A Closed questions
- B Open questions
- C Questions to test the interest in work
- From the above, the most suitable type/types of questions to test the communication skills is/are

(1) A only.

- (2) B only.
- (4) A and B only. (5) A and C only.
- 33. An activity under 'Adventure Tourism' is
 - (1) going to a sanctuary. (2) visiting a farm.
 - (3) climbing mountains. (4) walking in the beach.
 - (5) worshipping the religious places.

(3) C only.

34. From the following, what is the incorrect statement regarding tourism? (1) A recreational activity during leisure time. (2) Displacement from the familiar environment to a different place. (3) Going to a certain place without any intention of obtaining an incentive. (4) The maximum stay should not be less than 10 months. (5) At least one night should be spent in a certain place. 35. From the following which is the correct statement regarding 'Mass Tourism'? (1) A modern tourism stream (2) Causes minimum negative impact on the environment (3) Directs to popular tourist destinations (4) Can get experiences in depth (5) Tours in very small groups 36. The tourism of non-resident visitors to the economic territory of a considered country is termed as (1) outbound tourism. (2) internal tourism. (3) inbound tourism. (4) national tourism. (5) domestic tourism. **37.** Following are some statements regarding household services. Which is the correct statement from them? (1) Measuring the temperature and the pH value are two physical tests used to test the suitability of water for consumption. (2) The diameter of the water pipe which supplies water to the wash basin of the kitchen should be 25 millimeters. (3) The single phase electricity of the national electricity system in Sri Lanka is 110V. (4) The lifespan of a compact fluorescent lamp is more than that of a fluorescent lamp. (5) In consumption of electricity, a unit of electricity is considered as one kilowatt. 38. Given below are some statements regarding the consumption of water. What is the correct statement from them? (1) Water used for washing clothes should be disposed to a septic tank. (2) Rain water is not suitable for washing clothes due to its hardness. (3) A good habit of using the washing machine is to use with minimum load. (4) Suitability of water for drinking could be decided by measuring its E-coli content. (5) Malaria and tetanus could be transmitted by water contaminated with micro-organisms in human and animal faeces. 39. Following are some statements regarding electrical energy. Select the correct statement from them. (1) Use of a hot-plate is more suitable than an immersion heater in conserving heat. (2) The potential difference in an electric supply is measured by volt (V). (3) The flow of electrons in a conductor is measured by Ohm. (4) The current supplied to a house through the live wire, first goes through the fuse. (5) Ocean waves, Bio-mass and charcoal are regenerated sources of energy. 40. Following are some statements regarding the supply of water by the National Water Supply and Drainage Board. A - Three charging methods are practised for water consumption in Sri Lanka. B - The board spends Rs. 160.00 as the capital and maintenance cost per unit of water. C - The presence of elements such as Chromium and Lead in water makes it unsuitable for drinking purpose. The correct statement/s from the above is/are (1) A only. (2) B only. (3) A and B only. (4) A and C only. (5) B and C only.

AL/2019/28/E-I (NEW)

 41. The emission of green house gases to the environment is minimum when (1) using drinking water bottles. (2) using bio fuels. (3) consuming processed foods. (4) having yellow flames in cookers. (5) using refrigerators. 	
 42. Given below are some statements regarding the 'green house effect'. A - Plantation programmes enhances the green house effect. B - Enhanced green house effect causes melting of glaciers. C - If the green house effect does not exist, global temperature would be -18°C. D - The paddy plantation minimizes the green house effect. The correct statements from them are (1) A and B only. (2) B and C only. (3) A, B and C only. 	
 43. A functional food and a medicinal food respectively are (1) tomato and soya. (2) yoghurt and gotukola. (3) gotukola and spinach. (4) carrot and mukunuwenna. (5) yoghurt and tomato. 	
 44. A method of waste disposal that is not environment friendly is? (1) separating and recycling. (2) producing compost by decomposition of organic matter. (3) dumping solid waste in drains compactly. (4) dumping to the sea about 30 km away from the beach. (5) production of bio gas. 	
 45. Select the correct statement regarding the physical development of adolescent girls and boys. (1) The adolescence begins at the same age. (2) The enlargement of the larynx is visible. (3) The reproductive hormones are activated. (4) Mature reproductive cells are stored in the body. (5) The bone maturity is terminated at 17 years of age. 	
 46. A characteristic shown during the mental development of adolescents is (1) self-centredness. (2) deciding on the truth only by the facts heard and seen. (3) tend to develop concrete thinking. (4) having the ability to understand about time and space. (5) commencement of reversible thinking. 	
47. When adolescents socialize, they	
 A - act according to the wishes of elders. B - aim at leadership. C - tend to act for the well-being of the society. D - come forward to take responsibilities. The correct statements from the above are (1) A and B only. (2) B and C only. (3) C and D only. (4) A, B and C only. (5) B, C and D only. 	
 48. An important fact in guiding the children to develop 'self-concept' is (1) the adult intervention in the day to day activities. (2) comparing with different abilities of other children. (3) solving the challenges and problems by the elders. (4) rewarding the children even in minor achievements. (5) disclosing the weaknesses of children in front of others. 	

49. Following are some ideas given by a group of students about entrepreneurship.

A - Providing services come under entrepreneurship.

B - Taking risks is harmful to the business.

C - Competitive analysis is important to the business.

D - Success of a business depends on the investment of a large capital. The correct ideas from these are

The confect lucas from these are

(1) A and B only.
(2) A and C only.
(4) B and D only.
(5) C and D only.

(3) B and C only.

50. To increase the productivity of a business

- (1) the management should be centralized by the entrepreneur.
- (2) strong rules and regulations should be enforced in the business.

(3) steps of the management process should be followed.

(4) engaging on new trials should be considered as a loss of resources.

(5) advertising should be considered as the most effective method.
